Java Single Linked List Program

```
class node {
    String data;
    node next;

    node(String data) {
        this.data = data;
        next = null;
    }
}

class Linked {
    node head, tail;

    public void add(String data) {
        node newNode = new node(data);

        if (head == null) {
            head = newNode;
            tail = newNode;
        } else {
            tail.next = newNode;
            tail = newNode;
        }
    }

    void display() {
        node temp = head;

        while (temp != null) {
            System.out.println(temp.data);
            temp = temp.next;
        }
    }
}

public class Main {
    public static void main(String[] args) {

        Linked l = new Linked();

        l.add("Aravind");
        l.add("Kumar");

        l.display();
    }
}
```
